Steering System Resets

Electronic Stability Control

- ✓ Since 2009, Hunter has supported steering system resets as required by the OEM.
- ✓ Several systems use electric steering system output to determine the vehicle's travel direction.
- ✓ The majority of newer vehicles on the road today require these resets.

CodeLink® reset procedure updates are complimentary for Hunter customers with the latest WinAlign® Specification Database. See your local Hunter Service Representative for equipment requirements and more information.

Because of continuing technological advancements, specifications, models and options are subject to change without notice.

WinAlign and CodeLink® are registered trademarks of Hunter Engineering Company.
